

Note: The contractor shall coordinate with the crane supplier and equipment vendor to confirm that the equipment weight is within the capacity of a crane that can access and operate within the proposed space. The contractor may propose alternative methods for placing the equipment on the roof, including delivering it in sections and assembling it on the roof using a smaller crane or transporting the sections via the facility elevator. All proposed options shall be subject to review and approval by the applicable entities.

Subject: RE: Large Equipment Mobilization Discussion (662873 Lab Expansion Phase 2)

Kyle,
What is the approximate lifting height?

Largest equipment
