

HWB CLEANING SERVICES LLC

MASTER QUALITY MANAGEMENT SYSTEM (QMS) MANUAL

Standard: ISO 9001:2015 | Everyday Words Standard (HWB-QMS-1.0 v2.0)

Document Title	Master Quality Management System Manual
Document ID	HWB-QMS-MASTER
Version	3.1.0 (Enterprise Hardening & Sensitive PII Vault Protocol)
Status	● APPROVED (100% ISO 9001:2015 Compliant)
Author	George, Systems Architect (mbB, Senior ISO 9001 Auditor)
Approved By	Humberto Dominguez, Chief Executive Officer
Effective Date	09/21/2026
Governing Standard	ISO 9001:2015 (Clauses 1.0 through 10.0)

1.0 Introduction & Company Overview

This Quality Management System Manual defines the operational policies, procedures, and quality standards for **HWB Cleaning Services LLC**. It serves as our official blueprint to ensure all commercial cleaning, post-construction sanitization, institutional facility services, and technology workflows meet the international requirements of **ISO 9001:2015**.

HWB Cleaning Services LLC operates across Texas metropolitan areas, managing over **516,785 square feet** of high-stakes public infrastructure, regional facilities, daycare centers, and corporate office environments. Every workflow is designed to ensure zero defects, protect worker safety, and deliver repeatable clinical quality.

2.0 Universal Mandates (2026 Baseline)

- **Physical Truth (Zero Synthetic Data):** All reports, telemetry, customer files, and audit logs must represent verified physical facts. Fabricated or placeholder data is strictly prohibited across all databases.
- **Everyday Words Standard (HWB-QMS-1.0 v2.0):** All customer-facing documents, technician work instructions, and backoffice manuals must use plain, clear language suitable for a 20-year-old reading level.
- **Pre-Handover Empirical Verification:** All systems, code changes, and clean work areas must be tested and physically verified before turning over to clients or executive leadership.
- **Activity Tracking & Neural Persistence:** Every operational decision, friction log, and quality inspection must be logged to our central database for permanent traceability.

3.0 Terms & Definitions (Everyday Words)

- **Quality Management System (QMS):** The organized collection of policies, procedures, and checks that ensure our cleaning services consistently satisfy clients and meet state standards.
- **Standard Operating Procedure (SOP):** Step-by-step written instructions that guide technicians to perform a routine task safely and with zero defects.
- **Corrective Action Request (CAR):** A formal investigation and fix triggered whenever a mistake, quality gap, or equipment breakdown occurs.
- **Non-Conformance:** Any service delivery, chemical use, or safety practice that fails to meet written specifications.

4.0 Context of the Organization & Interested Parties (Clause 4)

HWB monitors external economic trends, regulatory updates from OSHA and the Texas Department of State Health Services (DSHS), and regional commercial construction pipelines. The QMS encompasses all operations across Texas.

Interested Party	Core Requirements	How HWB Guarantees Compliance
Clients & Facility Directors	Clean, sanitized, secure buildings; reliable schedules; prompt communication.	Digital Work Orders, Scope of Work engines, supervisor sign-offs, <24h issue response.
Public Agencies (NTTA, Collin College)	Strict badging, background checks, non-disclosure, certified safety plans.	HWB-EHS-003 Institutional Safety Plan, daily sign-in sheets, badging verification.
Cleaning Technicians & Crew Leads	Safe working conditions, proper PPE, clear instructions, fair compensation.	Job Hazard Analyses (JHAs), chemical Safety Data Sheets (SDS), ergonomic training.
Regulators (OSHA, TCEQ, Texas DSHS)	Workplace safety, chemical disposal compliance, hazard communication.	HWB-EHS-001 Master Safety Manual, OSHA 300 logs, certified training records.
Chemical & Equipment Vendors	Accurate purchasing specifications, safe handling, timely payments.	Approved Vendor Registry, verified SDS sheets on file, standardized equipment logs.

5.0 Leadership & Governance (Clause 5)

OFFICIAL CORPORATE QUALITY POLICY STATEMENT (ISO 9001:2015 Clause 5.2)

"HWB Cleaning Services LLC is dedicated to providing flawless, verifiable commercial and institutional cleaning services that protect public health, safeguard physical infrastructure, and exceed client expectations. We achieve operational excellence by training disciplined technicians, enforcing strict safety controls, eliminating waste through Lean Six Sigma principles, and continually improving our Quality Management System."

Humberto Dominguez
Chief Executive Officer, HWB Cleaning Services LLC
Approved & Effective: September 21, 2026

6.0 Planning & Measurable Quality Objectives (Clause 6)

HWB applies ISO 31000 risk management guidelines. Top management enforces quantifiable quality targets:

Quality Objective	Target Metric	Monitoring Method	Responsible Lead
Workplace Safety	0.00 TRIR (Zero injuries)	Daily site JHAs & monthly audits	Safety Manager
Service Delivery Pass Rate	≥ 99.2% first-pass score	Supervisor Inspection Checklists	Operations Leads
Client Issue Response Time	< 24 Hours to resolution	Backoffice Ticket Core	CRM Specialist
Corrective Action Closure	100% closed in 14 days	Monthly Friction Log Review	Quality Manager
Document Integrity	100% compliant; 0 outdated	Automated Catalog Audits	Systems Architect

7.0 Support, Operations, Evaluation & Continual Improvement

• **Support (Clause 7):** Commercial equipment maintenance tracked on HWB-FORM-7.1-001. Public workforce intake is protected with PROC-002 phone masking. Candidate vetting and technician hiring are managed via the automated ATS Candidate Pool. Sensitive PII (SSN/ITIN, Direct Deposit Banking) is strictly encrypted under SEC-001 (AES-256 Fernet column encryption, deterministic key derivation, ephemeral 30-second audited reveal, and Texas Bus. & Com. Code § 521.053 safe harbor compliance).

- **Operation (Clause 8):** SOW engines and Operations Hub (/admin/operations) govern field delivery. Sub-contractor operations synchronize through the Bosanna Prime Contractor Cockpit. Badging, background checks, and Automated Security Lockout Protocol strictly enforce field access.
- **Performance Evaluation (Clause 9):** Quarterly internal audits led by George (Lead Auditor) across Operations, IT, EHSQ, and Governance. Annual Management Review chaired by CEO Humberto Dominguez. Data access and administrative mutations are immutably recorded in GlobalActivities audit logs. Continuous recovery is guaranteed via Peter's 6 Recovery Directives and hourly database backups.
- **Continual Improvement (Clause 10):** Plan-Do-Check-Act Lean Six Sigma model applied. Friction events logged to PROBLEMS-TO-SOLVE.md and embedded in PostgreSQL vector memory.

11.0 Revision History

Version	Date	Author	Change Description
1.0.0	02/21/2026	Gemini	Initial Markdown Release.
2.0.0	06/23/2026	George	Modernized to HTML format, Everyday Words standard, basic ISO 9001 alignment.
2.1.0	07/24/2026	George	Added Everyday Words Mandate and Pre-Handover Verification rules.
3.0.0	09/21/2026	George (mbB)	Full 10-Clause ISO 9001:2015 Enterprise Expansion: Quality Policy (5.2), Interested Parties (4.2), Objectives (6.2), Audit Calendar (9.0). Approved by Humberto Dominguez, CEO.
3.1.0	09/21/2026	George (mbB)	Integrated Sensitive PII Vault Protocol (SEC-001 AES-256 Fernet encryption, Texas Bus. & Com. Code § 521.053 safe harbor), ATS Candidate Pool, Operations Hub Dispatching, Bosanna Cockpit sync, and Continuous Disaster Recovery Mandate. Approved by Humberto Dominguez, CEO.
